

## **SP GROUP EMPOWERS ALL IN SINGAPORE TO TRACK AND REDUCE CARBON FOOTPRINT**

**Singapore, 24 October 2019** – SP Group today announced plans to enable all Singapore households and businesses to track and reduce their carbon footprint. The Carbon Footprint Tracker will enable all 1.6 million consumers to track their carbon footprint, based on their power consumption and lifestyle. It will be available on the SP Utilities App (the App) by December this year.

Mr Wong Kim Yin, Group Chief Executive Officer, SP Group, said: “With our Carbon Footprint Tracker, consumers can see how their actions impact the environment. Armed with this knowledge, they can take action to improve their habits towards a higher quality, sustainable lifestyle.”

The Carbon Footprint Tracker is designed to create awareness, provide tools to take action, and effect changes that will reduce carbon emissions. Additional features will be progressively added in the first half of 2020. Consumers can use simulation tools to calculate their emissions based on daily activities such as mode of transport, air travel, consumption habits, buying habits and energy use. The tool will also incorporate gamification for consumers to engage in healthy competition with other household members, neighbours and friends to achieve their green targets.

Anyone with an SP utilities account can download the App and use the Carbon Footprint Tracker and tools, regardless of their electricity retail provider or meter type.
